

## Speech Therapy CPT codes

Here is a comprehensive table of common Speech Therapy CPT codes with descriptions, typical service times, reimbursement rate info (2025 estimates based on Medicare fee schedules), and applicable modifiers:

| CPT Code | Description                                                                                                 | Service Time       | Reimbursement Rate (2025 est.)    | Common Modifiers                                                              |
|----------|-------------------------------------------------------------------------------------------------------------|--------------------|-----------------------------------|-------------------------------------------------------------------------------|
| 92507    | Treatment of speech, language, voice, communication, and/or auditory processing disorder, individual        | Usually 15 minutes | ~\$36 - \$42 per 15 min           | GN (therapy by SLP), KX (medically necessary continued care), 95 (telehealth) |
| 92508    | Treatment of speech, language, voice, communication, and/or auditory processing disorder; group (2 or more) | Group session      | Less than individual rate; varies | GN, KX, 95                                                                    |
| 92521    | Evaluation of speech fluency (e.g., stuttering, cluttering)                                                 | Evaluation session | ~\$80 - \$100 per session         | 22 (increased service)                                                        |

|       |                                                                                                                     |                    |                            |            |
|-------|---------------------------------------------------------------------------------------------------------------------|--------------------|----------------------------|------------|
| 92522 | Evaluation of speech sound production (articulation, phonological process, apraxia, dysarthria)                     | Evaluation session | ~\$80 - \$100 per session  | 22         |
| 92523 | Evaluation of speech sound production w/ language comprehension and expression                                      | Evaluation session | ~\$100 - \$120 per session | 22         |
| 92524 | Behavioral and qualitative analysis of voice and resonance                                                          | Evaluation session | ~\$100 - \$120 per session | 22         |
| 92526 | Treatment of swallowing dysfunction and/or oral function for feeding                                                | Each 15 min        | ~\$30 - \$40 per 15 min    | GN, KX, 95 |
| 92606 | Therapeutic services for the use of a non-speech-generating augmentative and alternative communication (AAC) device | Varies by service  | Medicare limits vary       | GN         |

|       |                                                                                                       |                          |                         |        |
|-------|-------------------------------------------------------------------------------------------------------|--------------------------|-------------------------|--------|
| 92609 | Therapeutic services for speech-generating device (SGD), including programming and training           | Varies                   | Medicare limits vary    | GN     |
| 97129 | Therapeutic interventions focused on cognitive function and compensatory strategies; first 15 minutes | 15 minutes               | ~\$35 - \$45 per 15 min | GN, KX |
| 97130 | Each additional 15 minutes of cognitive therapy                                                       | An additional 15 minutes | ~\$35 - \$45 per 15 min | GN, KX |

## Notes:

- Service times are generally 15 minutes per unit or session for treatment CPTs.
- Reimbursement rates can vary significantly by payer, provider location, and contract agreements. The provided rates are typical Medicare fee schedule ranges for 2025.
- Common modifiers used in speech therapy billing include:
  - GN: Service provided by a speech-language pathologist
  - KX: Medically necessary continued treatment beyond therapy cap limits
  - 95: Telehealth synchronous service
  - 22: Increased procedural services (must be justified/documented)

This summary provides commonly used CPT codes, billing considerations, timing, and reimbursement ranges to support speech therapy billing and coding needs.
